JSTOR is a digital library of academic journals, books, and primary source objects. JSTOR helps people discover, use, and build upon a wide range of content through a powerful research and teaching platform, and preserves this content for future generations. JSTOR is part of ITHAKA, a not-for-profit organization that also includes Ithaka S+R and Portico. For more information about JSTOR, please contact support@jstor.org.

was fumigated by the Cuban Sanitary Department on arrival and re-fumigated by this service after discharge of cargo. The following vessels were disinfected during the week at the request of their masters or agents:

Spanish steamship, *Puerto Rico*, for New Orleans; Norwegian steamship, *Times*, for Mobile; American schooner, *Doris*, for Pensacola; and Norwegian steamship, *Galveston*, for New Orleans and Galveston, via Progreso.

Report from Matanzas—Inspection of vessels.

Acting Assistant Surgeon Nuñez reports, June 1:

Week ended June 13.

One bill of health was granted to a vessel clearing for the United States in good sanitary condition. No quarantinable diseases were reported.

Reports from Santiago—Inspection of vessels—History of yellow fever case previously reported.

Acting Assistant Surgeon Wilson reports, June 12:

Week ended June 6, 1908.

Bills of health were issued to four vessels bound for the United States.

No quarantinable disease was reported during this week.

The following is a history of the case of yellow fever reported yesterday. [See Public Health Reports, June 19, page 883.] The patient, a Spaniard, aged 15, had lived six months in Santiago, Cuba. June 4 he was taken ill and June 5 was admitted to the sanatorium of the Colonia Española.

The patient died June 11; an autopsy made June 12 gave typical evidences of yellow fever.

ECUADOR.

Reports from Guayaquil—Summaries for months of January, February, March, and April, 1908; transactions of Service; plague, smallpox, and yellow fever.

Assistant Surgeon Wightman reports, May 27, through Passed Assistant Surgeon Lloyd:

Month of January, 1908. Twelve steamships dispatched by this office, all of them being fumigated.

In the same month 351 deaths were reported in Guayaquil, including yellow fever 13 and smallpox 17.

Month of February. Seven vessels fumigated and dispatched by this office.

Bubonic plague made its appearance in Guayaquil in this month, as already reported.

The total number of deaths officially recorded for February was 385, including plague 11, yellow fever 30, and smallpox 15.

Month of March. Eight steamships were fumigated and dispatched by this office.

In the same month 645 deaths were officially reported in Guayaquil, including plague, 119, yellow fever, 17, and smallpox, 17.
